1. Welcome to Nexora

Welcome to Nexora Technologies. This User Manual is your guide to creating and managing your account, navigating Nexora products, and getting help when you need it. For full policy details, this manual directs you to the dedicated policy documents in the Nexora knowledge base rather than repeating every condition in full.

2. About Nexora Technologies

Nexora Technologies develops secure, intelligent, and scalable cloud solutions that help individuals, growing teams, educational institutions, and businesses collaborate, manage information, understand business data, and provide better customer support. Nexora's tagline is: Smart Technology. Smarter Support.

3. Product Ecosystem

Nexora offers four core products: Nexora CloudDesk for team collaboration, Nexora SecureVault for secure document management, Nexora InsightPro for AI-powered business analytics, and Nexora Connect for customer communication. Full product details are available in the Product Guide document.

4. Creating an Account

- 1 Visit the Nexora sign-up page.
- 2 Enter your registration details.
- 3 Create a password that meets Nexora's password requirements.
- 4 Complete account verification where required.

5. Signing In

Sign in to your Nexora account using your registered email address and password through the web application, or through the desktop or mobile application for your selected product.

6. Password Requirements

Your password must be a minimum of 8 characters and a maximum of 128 characters, and must include at least one uppercase letter, one lowercase letter, one number, and one special character.

7. Password Reset

If you forget your password, go to Login, select Forgot Password, enter your registered email address, open the secure reset link sent to you, create a new password, and sign in again. Nexora support cannot view or recover your existing password and will never request your complete password.

8. Account Security

- Do not share your password.

- Use a unique password for your Nexora account.
- Sign out from shared devices.
- Review your active sessions regularly.
- Use multi-factor authentication where available.

9. User Profile

Your user profile stores your account details, including your registered email address and display information. You can update your profile details from your account settings.

10. Preferred Language

Official Nexora knowledge-base documents are published in English. Nexora's conversational support is planned to support English, Hindi, and Marathi.

11. Dashboard Navigation

After signing in, you land on your Nexora dashboard, which provides access to your subscribed products, recent activity, and account settings. From the dashboard, you can navigate to any product included in your subscription plan.

12. Product Access

The products available to you depend on your subscription plan. You can access Nexora CloudDesk, Nexora SecureVault, Nexora InsightPro, and Nexora Connect from your dashboard, subject to your plan's user and feature limits.

13. Using Nexora CloudDesk

Nexora CloudDesk provides a centralized digital workspace for communication, task management, file collaboration, meetings, and project organization.

13.1 Core Workflow

- 1 Open or create a team workspace.
- 2 Create a project board and add tasks.
- 3 Assign tasks to team members.
- 4 Use team messaging and shared calendars to coordinate work.
- 5 Join video meetings directly from the workspace.

Role-based workspace permissions determine what each team member can view or edit. Third-party integrations can be configured to connect CloudDesk with other tools your organization uses.

14. Using Nexora SecureVault

Nexora SecureVault provides encrypted cloud storage and permission controls for business documents.

14.1 Core Workflow

- 1 Upload documents into organized folders.
- 2 Apply role-based access to control who can view or edit each folder.
- 3 Share files securely using expiring share links.
- 4 Review file-version history and document activity logs.
- 5 Recover deleted files where needed.

Enabling multi-factor authentication and reviewing administrative security controls is recommended for workspaces that store sensitive documents.

15. Using Nexora InsightPro

Nexora InsightPro turns operational data into dashboards, reports, and forecasts.

15.1 Core Workflow

- 1 Import data using CSV or spreadsheet import, or the desktop data connector.
- 2 Build interactive dashboards from imported data.
- 3 Review AI-generated business insights and trend identification.
- 4 Set up scheduled reports and share dashboards with your team.
- 5 Export data as needed.

16. Using Nexora Connect

Nexora Connect brings customer conversations from multiple channels into a single support workspace.

16.1 Core Workflow

- 1 Review incoming messages in the customer-support inbox.
- 2 View customer profiles and conversation history.
- 3 Assign conversations to the appropriate team member.
- 4 Reply using response templates or custom messages.
- 5 Track ticket status until the conversation is resolved.

17. Workspace Management

Workspace administrators can manage workspace settings, invite or remove team members, and configure role-based permissions across Nexora products included in the subscription plan.

18. Team Invitations

To invite a team member, an administrator sends an invitation to the team member's email address. The invited member creates or signs in to their Nexora account and joins the workspace with the assigned role.

19. Roles and Permissions

Role-based permissions determine what each team member can view, edit, or manage within a workspace. Administrators can adjust roles as team responsibilities change.

20. File Management

Files across Nexora CloudDesk and Nexora SecureVault can be organized into folders, shared with specific team members or externally through expiring share links, and recovered from deleted-file recovery where applicable.

21. Notifications

Nexora products send notifications for activity such as task assignments, new messages, and file changes. Notification preferences can be adjusted from your account or workspace settings.

22. Billing Settings

Billing settings are available from Account Settings, then Billing. From here, you can view your current plan, update payment methods, view invoices, and manage your subscription.

23. Subscription Management

You can review your active plan, usage against plan limits, and available upgrade options from your billing settings.

24. Plan Upgrades and Downgrades

You can upgrade your plan at any time to unlock additional features, users, or storage. You can also downgrade your plan, though this may reduce access to higher-tier features, so review plan capabilities before downgrading. Full plan details are available in the Pricing document.

25. Subscription Cancellation

To cancel your subscription, go to Account Settings, then Billing, then Manage Subscription, then Cancel Subscription. Cancellation stops future automatic renewal, and paid access continues until the end of the current paid billing period. Cancellation alone does not automatically create a refund; see the Refund Policy document for refund eligibility.

26. Invoices

You receive a payment receipt by email after successful payment, and can view all invoices from your account billing settings at any time.

27. Payment Methods

Nexora accepts credit cards, debit cards, UPI, net banking, and approved business invoicing for eligible Enterprise customers.

28. Failed Payments

If a payment fails, you receive an email notification, and Nexora may retry the payment. There is a 7-day grace period during which paid features generally remain available while you update your payment method. After the grace period, paid features may be temporarily restricted until payment succeeds.

29. Free Trial

Nexora provides a 14-day Professional trial that does not require a payment card to begin. After the trial, your account returns to Free-plan limits unless you select a paid plan. Full trial terms are available in the Pricing document.

30. Data Retention

While your subscription is active or within its paid billing period, your data remains accessible according to your plan. After account closure, your data is retained for exactly 30 days to support recovery, after which it may be scheduled for secure deletion, except where certain records must be retained for legal, billing, fraud-prevention, or regulatory reasons.

31. Account Closure

You can request account closure from your account settings. Review the Data Retention section above before closing your account, since data recovery is only available during the 30-day retention period.

32. AI Support Assistant

The Nexora AI support assistant is available 24/7 to help answer common questions and guide you to the right resources.

33. Help Center

The Nexora Help Center is available 24/7 and provides self-service articles covering common tasks across all Nexora products.

34. Support Tickets

You can submit a support ticket through the support-ticket portal at any time, 24 hours a day, 7 days a week. Support tickets are handled according to your subscription plan's response target.

35. Complaints

Complaints, including billing disputes, repeated technical failures, product dissatisfaction, delayed support, service interruptions, data-access concerns, and staff or service-conduct concerns, can be submitted through the support-ticket portal.

36. Escalation

Complaints move through four escalation levels: Level 1, AI assistant or standard support; Level 2, specialized support team; Level 3, senior support specialist; and Level 4, customer resolution and escalation team. You receive a ticket or reference ID when a matter requires formal escalation.

37. Support Response Targets

Plan	Initial Response Target
Free	Within 48 business hours
Starter	Within 24 business hours
Professional	Within 12 business hours
Business	Within 4 business hours
Enterprise	Within 1 hour for critical issues

These are initial-response targets, not guaranteed resolution times.

38. Service Availability

Nexora targets 99.9% monthly service availability, excluding scheduled maintenance, emergency maintenance, customer-side failures, third-party provider incidents outside Nexora's reasonable control, and force-majeure events. Planned-maintenance notifications are provided in advance where practical.

39. Security Recommendations

- Use a unique, strong password that meets Nexora's password requirements.
- Enable multi-factor authentication where available.
- Sign out from shared or public devices.
- Review your active sessions periodically.
- Never share your password, including with anyone claiming to be Nexora support.

40. Troubleshooting

40.1 Cannot Sign In

Confirm your registered email address and password, and use the password reset flow if needed.

40.2 Missing Files or Tasks

Confirm you are viewing the correct workspace, check your internet connection, and confirm the item has not been moved or reassigned.

40.3 Notification Problems

Review your notification preferences in your account or workspace settings, and confirm the relevant application has notification permissions on your device.

40.4 Billing Questions

Review your billing settings for invoices and payment method details, or contact billing support through the support-ticket portal for further assistance.

41. Frequently Used Workflows

41.1 Inviting a Team Member

Go to your workspace settings, select Invite Member, enter the team member's email address, assign a role, and send the invitation.

41.2 Sharing a File Securely

In Nexora SecureVault, select the file, choose Share, generate an expiring share link, and set the desired expiry period before sending the link.

41.3 Building a Dashboard

In Nexora InsightPro, import your dataset, select the fields you want to visualize, choose a chart type, and save the dashboard for your team.

41.4 Responding to a Customer

In Nexora Connect, open the conversation from the unified inbox, review the customer profile, and reply using a response template or a custom message.

42. Glossary

Term	Definition
Workspace	A shared digital environment within a Nexora product where a team collaborates.
Role-based permissions	Access controls that determine what a user can view or edit based on their assigned role.
Grace period	The 7-day window after a failed payment during which paid features generally remain available.
Refund window	The number of calendar days during which an initial purchase is eligible for a full refund.
Service assurance	Ongoing support, updates, and maintenance provided for Nexora's SaaS products.
Escalation level	One of four support tiers used to route unresolved or serious issues.
