1. Policy Purpose

This document explains what customers can expect from Nexora Technologies in terms of software service assurance, and describes the limited warranty that applies to eligible physical equipment supplied as part of selected Enterprise deployments.

2. Scope

This policy applies to all Nexora subscription products, namely Nexora CloudDesk, Nexora SecureVault, Nexora InsightPro, and Nexora Connect, as well as to physical equipment that Nexora supplies to eligible Enterprise customers.

3. SaaS Service Assurance Explained

Nexora subscriptions are software services, not physical products, so they are supported through service assurance rather than a traditional physical-product warranty. Service assurance describes the ongoing support, updates, and maintenance customers receive for their subscription, rather than a guarantee against a physical defect.

4. Supported Product Versions

Nexora provides customers with access to supported versions of Nexora CloudDesk, Nexora SecureVault, Nexora InsightPro, and Nexora Connect for the duration of an active subscription.

5. Security Updates

Nexora applies security updates to its supported products to help protect customer accounts and data.

6. Bug Fixes

Nexora addresses reported software defects through ongoing bug-fix releases across its supported products.

7. Maintenance Releases

Nexora periodically issues maintenance releases that may include performance improvements, stability improvements, and minor feature refinements.

8. Technical-Support Availability

Customers receive technical-support access according to their subscription plan. Support-response targets for each plan are described in the Pricing document and the FAQ.

9. Service Limitations

Nexora does not guarantee uninterrupted operation of its products in every circumstance. The following sections describe common situations that fall outside Nexora's direct control.

10. Customer Internet Failures

Nexora products require a stable internet connection. Service interruptions caused by a customer's own internet connectivity are not covered by service assurance.

11. Unsupported Devices

Devices or operating systems that fall outside the supported platforms and versions listed in the Installation Guide are not covered by service assurance.

12. Third-Party Outages

Interruptions caused by third-party service outages, including infrastructure or connectivity providers outside Nexora's control, are not covered by service assurance.

13. Unauthorized Modifications

Issues resulting from unauthorized modification of a Nexora application, or from the use of unofficial or unsupported add-ons, are not covered by service assurance.

14. Customer Configuration Errors

Issues caused by incorrect account, workspace, or integration configuration on the customer's side are not covered by service assurance, although Nexora support can assist customers in correcting configuration issues.

15. Enterprise Physical-Equipment Warranty

Eligible Nexora-supplied physical equipment, provided as part of selected Enterprise deployments, includes a limited warranty as described below.

16. Warranty Duration

Eligible Nexora-supplied physical equipment includes an exact 12-month limited warranty from the date of delivery.

17. Covered Manufacturing Defects

The warranty covers manufacturing defects present in eligible physical equipment at the time of delivery.

18. Covered Normal-Use Hardware Failures

The warranty covers hardware failures that occur during normal, approved use of the eligible equipment.

19. Warranty Exclusions

The following are excluded from the physical-equipment warranty:

- Accidental damage.
- Liquid damage.
- Unauthorized repair.
- Misuse.
- Theft or loss.
- Cosmetic wear.
- Damage caused by unsupported equipment used alongside Nexora-supplied equipment.

20. Claim Procedure

Customers with an eligible warranty claim should contact support through the support-ticket portal, referencing the affected equipment and the nature of the issue.

21. Required Evidence

A warranty claim should include a description of the issue, the approximate date the issue was noticed, and, where applicable, photographs illustrating the fault.

22. Inspection

Nexora may request further information or, in some cases, request the return of the equipment for inspection in order to confirm whether the issue is covered under the warranty.

23. Repair or Replacement

Where a claim is confirmed as covered under the warranty, Nexora will arrange an appropriate repair or replacement of the affected equipment.

24. Limitation and Escalation

This warranty applies specifically to eligible Nexora-supplied physical Enterprise equipment and does not extend to third-party hardware. Customers who wish to escalate a warranty decision may do so through the support-ticket portal, following Nexora's Complaint and Escalation Policy.
